PRACTICE SERVICES

Infection Prevention and Control

Our range of IPC support services aim to simplify regulatory and compliance systems and processes for practice teams with a friendly and supportive approach. We achieve this by providing clear, plain language guidance and feedback so your team can be confident they are best practice.

Onsite Coaching and Team Development - $869 (GST inclusive)

The purpose of this service is to facilitate IPC team development while supporting the creation of key components of a compliant Infection Control Manual while onsite.

This coaching session takes approximately two hours and is recommended recommended for the whole team.

Onsite Infection Control Reviews - $869 (GST inclusive)

This service involves a complete gap analysis of your practice against IPC regulatory documents. After the review, practice teams receive a comprehensive report with scoring for each key Infection Control area with specific guidance detailing exactly what can be done to achieve best practice.

Infection Prevention and Control Course

Continuing to Achieve Best Practice – Presented by Kylie Robb

Endorsed and delivered by the ADA, taking into account the COVID-19 context, this course is the premier source of contemporary infection control information for the dental profession in 2020.

For upcoming courses – check the ADA NSW CPD website or scan the QR Code.

Are you interested in Practice Accreditation?

Practice Services provides accreditation support to make the process of achieving accreditation as time effective as possible through the use of the ADA NSW Online Accreditation Hub and telephone/online support. Please contact Practice Services for further information.
